

# Launch Provider and Course Assessment

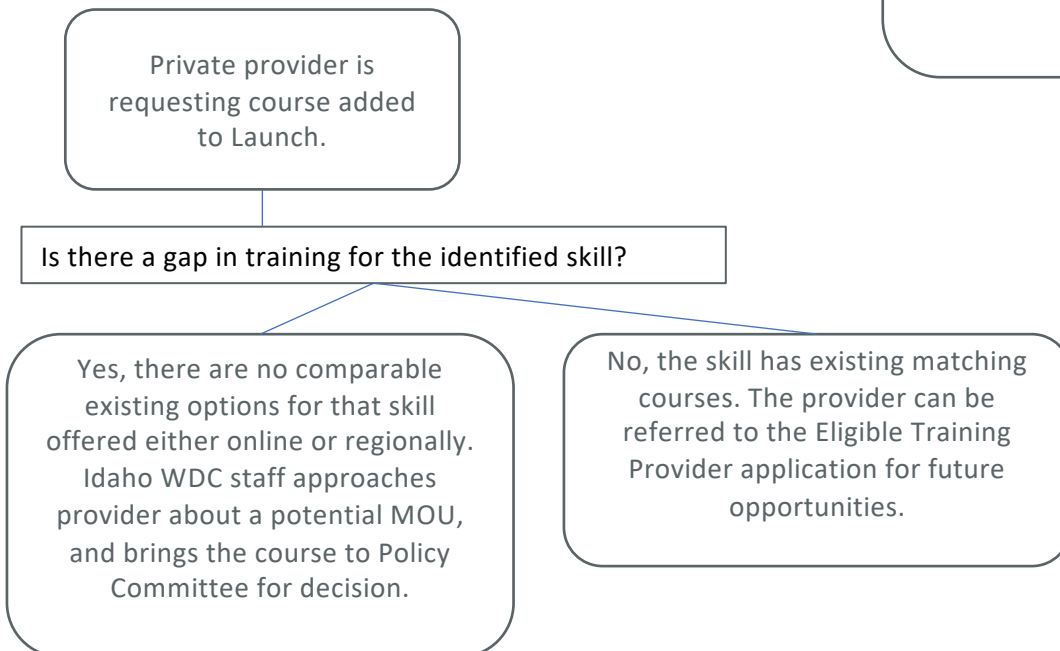

## Goals:

- Council retains decision making for use of WDTF
- Matches employer identified skills to training
- Supports WDC strategies
- Values existing state resources
- Uses limited staff efficiently

## Scenario 1:

## Scenario 2:

### Scenario 3:

Training has been identified that aligns with both Idaho Launch skills and WDC strategic plan.

Idaho WDC staff approaches provider about a potential MOU, and brings the course to Policy Committee for decision.

### Scenario 4:

An Idaho public institution has a course that matches an existing Launch skill.

Course presented to policy committee for decision.

### Program Operations Clarifications:

- If the exact same course offered through a third party is approved for one of the Idaho public institutions, it is automatically approved for the other public institutions that offer the course.
- A cost increase of more than \$250 for a course within a 12-month period needs to be approved by the Policy Committee.
